ABOUT ECOLIBRI'...

Ecolibrì is a business segment of the company A.C.E. srl. that has 50 years of experience specializing in the field of wire harnesses. The project stems from the desire to create sources of clean and renewable energy.

The choice was to study a device for accumulation of energy for own consumption (off grid.) So Ecolibrì a hybrid wind power systems with sizes from 3.5 to 9.9 kW was developed.

Today we are able to make independent those who currently have no access to the electricity grid in their location or where the supply of electricity is not readily available and / or very expensive.
