The Chief of Tikhuba

Honorable Ambassador of UE in Swaziland Nicola Bellomo

Ambassadors and Councilors

Guests, stakeholders and Partners

Press and journalists

Principal School director & deputies

All Teachers & Students of Tinkumba High School

All ECOLIBRI TEAM

Ladies & Gentlemen

In the past November 2015 has been signed a Memorandum of understanding between Ecolibri & Marteeza Investments who allows and represent ECOLIBRI registered trade mark in the Kingdom of Swaziland.

From this agreement two pilots were installed. One here at the Lubombo Region at Tikhuba High School and another at HHOHHO Region in NGWENYA in AMADI University Campus.

It is really an honor to be here in Swaziland in this particular place and among all of you in a true community spirit .

We are really in a mission of giving a contribution for providing clean energy solutions for Africa particularly in Swaziland.

Sustainability, clean energy and reduction of the carbon foot print is indeed our goal in a way to reduce the energy country deficit and allow a better life to enterprises, families and people in general.

ECOLIBRI is a very recent established company in Italy born in a family nest with 50 years of industrial activity and experience. ACE is a family company lasting for tree 3 generation .

ECOLIBRI is a result of a dream to create a new concept of sustainability and energy supply allowing people to accede to electricity everywhere and every time, providing an off grid solution with the storage of the power.

We have developed an Hybrid Energy Solution System creating a micro wind turbine with the finest materials and technologies to allow energy generation with natural and clean resources . We believe that wind and sun will be always present in our lives.

I will not go into technical details to explain to this selected audience what our system is about and what we can achieve. Certainly that we can allow and facilitate Energy and Power to people and we can also contribute in the reduction of the energy deficit in the country.

Providing clean and renewable ENERGY even in remote areas of the country is also our commitment. This beautiful High School is a true example that we can provide a better future and a better live.

We have agreed with the Minister of Energy and Natural Resources the installation of one of our Pilots a 3,5 plus 2 kw ( solar panels ) are here installed and working reducing the electricity school bill. This is a fact that all of us are living here and today.

ECOLIBRI has provided all this system , manufactured in ITALY with the best technology in the world has crossed the ocean transporting the equipments and technicians investing a lot in financial resources exclusively to show to everybody that we can be a part of the solution for energy supply in the country.

This school will be a beneficiary for a period of three (3) to five (5) years to Free Energy Supply and it will be a show case for all Swaziland. We are indeed very glad to contribute for this reality.

In last June 2016 we have signed a MOU with the Ministry of Energy and Natural Resources one year after we are officially opening this site.

We have done a lot, we have really invested a lot ! We succeeded!...

Thank you ! Tank you all !...

We are aware about the energy dependence of the country and also about the efforts that the local authorities are doing to create new solutions opening widely arms to new projects and also the clear choice and strategy of going green.

We are already a part of the solution

This is a true privilege for us to be a very small contributors to this inevitability of world Energy Challenge. Reducing the carbone foot print and allow access to energy, to the people and population is actually for us one big propose and a mission.

Not only for us but for a lot of people and certainly for his selected audience.

Please allow me to give an answer to two QUESTIONS:

First: Can we feed all the energy needs of a country like Swaziland ?

Second: Can we be a part of the solution of the local energy supply ?

These are indeed two difficult questions with simple answers.

**NO** to the first and a firm and convinced **YES** to the second one.

Our goal will be in the very next future assembling Ecolibri parts at the installed ECOLIBRI assembly center here in NGWENYA REGION in Swaziland, to respond the local market and also to assist SADAC region. To allow the ECOLIBRI solution in being a true and realible player in Energy Sector.

Regarding this our commitment is:

A) Improving the local economy

B) Creating jobs

Bringing the newest an world best technology to the country

**Improving people's lives is our mission and a mission for all**

In this way we'll transfer known-how to local and regional young technicians that are actually working with us in daily bases;

**This is also an opportunity for them to improve their lives.**

We are really an international team, we are working together in different parts of the world such as Italy, Portugal, Republic of Moldova, Swaziland, Mozambique, Tanzania, Botswana and South Africa.

We speak different languages, but we have an unic objective.

**Doing the best for the future and empowering people!**

**ECOLIBRI BETTER LIFE BETTER FUTURE**

I'm here to thank for all.

Thank you to allow us to a safe arrival in this fascinating project.

And now a very particular thank to the honorable Minister of Energy and Natural Resources, Senator JABULILE MASHAMA who has since the very beginning one year ago, understood and accepted our proposal for introducing our first pilot in Africa here in Kindom of Swaziland.

**She is for us really a reference.**

Thank you honorable Minister.

Thank all the personalities and institutions present here.

I would like to express also my personal thank you for their interest in our project and particularly to my friend Ambassador from UE that was always present and really an important reference,

***Allow me to say just a few words in Italian ...***

GRAZIE MILLE NICOLA PER TUTTO QUELLO CHE HAI FATTO PER NOI !...

Finally in my personal name DONATELLA SCARPA and on the behalf of the ECOLIBRI team I express my gratitude for the presence of all of you in this very particular moment.

**We are all here today making "History".**

ECOLIBRI IS NOT ANYMORE A DREAM IT'S A TRUE REALITY THAT ALL OF US ARE LIVING WITNESSES ...

TANK YOU , TANK YOU ALL AGAIN ...
